

Project Design Phase-I
Proposed Solution Template

Date	25 September 2022
Team ID	PNT2002TMID00104
Project Name	Project – University Eligibility predictor
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The aim of this project is to help students in shortlisting universities with their profiles.
2.	Idea / Solution description	By using classification method, the university can be shortlisted using machine learning techniques and regression algorithms.
3.	Novelty / Uniqueness	Using classification and machine learning method, automated ranking system will be developed. Based on this student can choose their respective universities
4.	Social Impact / Customer Satisfaction	University is generated automatically according to student scores and preferences which saves a lot of time and effort.
5.	Business Model (Revenue Model)	Once this model becomes a practically applicable. This model can be sold to private and public universities and it can be sold for whooping prices. It makes the work easy for both students and university.
6.	Scalability of the Solution	It can also be implemented by the students who have completed their UG courses and also high school graduate students. This business model will be useful for every university and flexible to use.
